Modern medical science strives, if not exactly to exclude death, at least to eliminate as many as possible of its causes, to postpone it further and further, to prolong life more and more. ...The true cure for death must be different. It cannot lead simply to an indefinite prolongation of this current life. It would have to transform our lives from within. It would need to create a new life within us, truly fit for eternity. **Pope Benedict XVI, Easter Vigil Mass, April 3, 2010**
